

Dino Jackson

Python Backend Developer

✉ jacksondino00@gmail.com 📞 +919511524382 📍 Rajasthan, India [in](#) LinkedIn [🔗](#) Portfolio [🐙](#) Github

PROFILE

Backend-focused Python developer with experience building and deploying full-stack web applications using FastAPI, Django, PostgreSQL, Docker, and React. Skilled in REST API design, JWT authentication, database modeling, testing, and cloud deployment on Render and AWS EC2. Seeking Junior Python Backend / Full-Stack Developer roles.

PROFESSIONAL EXPERIENCE

TrineBridge, Python Automation Developer (Contract / Project-Based) November 2023 – January 2025

- Developed Python automation scripts for batch file processing, directory validation, and CSV transformation workflows.
- Added structured logging, error handling, and validation checks to improve reliability of recurring automation tasks.
- Standardized automation pipelines across 100+ production deliverables, improving consistency and reducing repetitive manual work

CODEXINTERN, Python Development Intern July 2025 – October 2025 | Remote

- Built 3 Python projects, including a CSV Analysis Tool, Flask Sentiment Analysis App, and external API integration project.
- Designed REST endpoints, handled JSON request/response flows, and debugged API integration failures.

SKILLS

Languages: Python, JavaScript, SQL

Backend: FastAPI, Django, Django REST Framework, Flask, REST APIs, JWT Authentication, Pydantic

Databases & ORM: PostgreSQL, SQLite, MySQL, MongoDB, SQLAlchemy, SQLModel, SQLAlchemy

DevOps & Deployment: Docker, Docker Compose, Render, AWS EC2, Git, GitHub, Linux

Testing: Pytest, FastAPI TestClient, Postman, API validation

Frontend: React, Next.js, HTML, CSS, Bootstrap, Tailwind CSS

AI/Search Project Experience: Semantic Search, Embeddings, RAG-style Retrieval, Vector Stores

PROJECTS

Job Intelligence Platform, FastAPI, React, PostgreSQL, Neon, Redis, Celery, Docker, Render, Pytest [Live](#) [🔗](#) | [Backend API](#) [🔗](#) | [Swagger](#) [🔗](#) | [Repo](#) [🔗](#)

- Built a full-stack career intelligence platform for job discovery, market analytics, recommendations, resume analysis, skill gap analysis, and application tracking.
- Designed FastAPI APIs for jobs, profiles, saved jobs, analytics, authentication, and admin-only manual job refresh.
- Modeled PostgreSQL data for users, profiles, jobs, companies, skills, saved jobs, and job-skill relationships.
- Deployed the React frontend and FastAPI backend on Render with Neon PostgreSQL and added backend tests for core workflows.

Blood Bank RAG AI, Django, Django REST Framework, Next.js, MongoDB (Vector Store), Sentence Transformers [Repo](#) [🔗](#)

- Built an explainable RAG-style semantic search system over structured healthcare-style data.
- Implemented embedding-based retrieval with metadata filters and deterministic AI summaries.
- Designed clean API contracts between frontend and backend services.
- Added safe fallback logic for low-confidence queries.

Job Tracker, Job Tracker, FastAPI, PostgreSQL, SQLModel, JWT, Docker, Render, AWS EC2, Pytest [Live](#) [🔗](#) | [Repo](#) [🔗](#)

- Built a full-stack job tracking platform with user authentication, job CRUD, analytics dashboard, and CSV/PDF export.
- Designed REST APIs with JWT authentication, protected routes, and request validation.
- Containerized the app with Docker and deployed on AWS and Render.
- Implemented CSV/PDF export features and tested core job tracking workflows with Pytest.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering, 2021 – 2025 | Udaipur, India
Geetanjali Institute of Technical Studies — CGPA: 8.44 / 10 (≈ 80.2%)

ACHIEVEMENTS & CERTIFICATIONS

DevOps Mastery Program-2024, Grras [🔗](#) , **ICMART-2025**, GITS: [🔗](#) Presented a paper titled “Blood Bank Management System”
